

We were founded with a unique mission that closely links the interests of business with a passion for the environment.

Protection of the environment is central to our business strategy. Accordingly, we have developed an outstanding Environmental Management System which is certified to ISO 14001 and registered with EMAS, the European Eco-Management and Audit Scheme.

Shields also operates a zero landfill policy. Equipment which is not suitable for re-use is safely recycled and returned to productive use.

In addition, we provide all our clients with full financial and environmental reports, which not only demonstrate the positive contribution to the bottom line, but also environmental excellence – contributing to our clients' corporate responsibility programs, reducing risk, and protecting their valuable brand.

Our environmental system has been incorporated into all company operations to ensure that we:

- Provide a fully auditable and sustainable solution that enables whole life-cycle management for telecommunications, data and IT equipment through re-use and recycling, husbanding the world's resources, eliminating landfill and protecting the environment.
- Manage and minimize environmental risks identified in our processing operations, and support service activities performed at client sites.
- Maintain our 100% regulatory compliance record.
- Measure and publicly report our environmental performance annually.
- Assess the environmental performance of key suppliers, and cooperate with suppliers, customers and business partners to achieve higher environmental standards.
- Encourage sustainable development through business example and voluntary endeavours both nationally and within the local community.
- Minimize the impact of our operations on the environment as related to the emissions of Green House Gases (CO2) to help combat climate change.

Shields Environmental has continually invested in the development of innovative software systems and processes, which are certificated to ISO 14001 and ISO 9001. This unique approach has enabled us to provide clients with comprehensive financial and environmental reports, backed by a complete audit trail for every product received – ensuring full compliance with legal and client-specific requirements.

We audit our operations for compliance with this policy, and measure progress made in our quest for continuous environmental improvement.

To measure our performance against industry at large, we participate in the Business in the Community Environmental Index. This index benchmarks companies on the basis of their environmental management and performance in key impact areas. The index helps analyze gaps, measure progress, drive improvement and raise awareness of the environment as a strategic, competitive issue at board level.

We are proud to have scored at the 'Platinum level' securing the highest score in our sector and in the top 1% of entries for environmental excellence.
